

Today's Science

HOW DO I ACCESS THE SITE?

There are two ways to access our site:

From a Library Computer:

Visit your library's Web site or check the library computers' desktops for a link to our database. Alternatively, ask your reference librarian where to locate our online resources.

From Home:

To access us from outside the library, check your library's Web site for the link to our site or contact your reference librarian. If further authorization is required, you will be prompted for the following:

WHAT INFORMATION WILL I FIND?

Today's Science bridges the gap between the science that students learn in the classroom and the discoveries pushing the boundaries of science today. Updated weekly, it explains important topics such as biology, chemistry, environment, space, physics, and technology. Features include:

- **Science news, written for students**, supporting the classroom curriculum with explorations of topics like forensics, evolution, and genetics
- **Weekly updates**, giving researchers the news they want now. *Today's Science's* extensively linked 15-year backfile shows how scientific knowledge builds over time
- **National Science Education Standards and the Curriculum-based Resource Center**, with a Science Fair Guide, making *Today's Science* a great tool for teachers
- **Pop-up glossary**, providing instant definitions of scientific terms, as well as a printable glossary
- **"Need a Research Topic?"** A one-stop menu that gets students started on their own scientific research
- **Thousands of editorial cartoons, photographs, diagrams, and crossword puzzles**, promoting learning and drawing students into the pursuit of science
- **Extensive biographies**, focusing on thousands of scientists—from historic figures to modern-day innovators
- **Links** to key news coverage, encyclopedia and almanac information, and other background articles.

I HAVE TECH QUESTIONS ...
